PBT: This product is not identified as a PBT/vPvB substance.

Section 3: Composition/information on ingredients

3.1. Substances

Chemical identity: ETHYL-2-CYANOACRYLATE

Section 4: First aid measures

4.1. Description of first aid measures

Skin contact: Wash immediately with plenty of soap and water. If adhesive bonding occurs, do not force skin apart. Skin may be peeled apart after soaking in warm soapy water using a blunt object. Cyanoacrylates give off heat on solidification. A large drop will generate enough heat to cause a burn. Treat burns normally after adhesive is removed from skin.

Eye contact: Bathe the eye with running water for 15 minutes. Transfer to hospital for specialist examination.

Ingestion: Wash out mouth with water. Ensure breathing passages are not obstructed. Product will polymerise immediately in the mouth making it almost impossible to swallow. Saliva will slowly separate solidified product from the mouth over several hours.

Inhalation: Not applicable. Not applicable. There are no appreciable vapours at ambient temperatures.

4.2. Most important symptoms and effects, both acute and delayed

Skin contact: There may be irritation and redness at the site of contact.

Eye contact: There may be pain and redness. The eyes may water profusely. There may be severe pain. The vision may become blurred. May cause permanent damage.

Ingestion: There may be soreness and redness of the mouth and throat. Nausea and stomach pain may occur.

Inhalation: There may be irritation of the throat with a feeling of tightness in the chest.

4.3. Indication of any immediate medical attention and special treatment needed

Section 5: Fire-fighting measures

5.1. Extinguishing media
